The screenshot shows the Namecheap website's 'Discover our full list of TLDs' page. The browser's address bar displays 'namecheap.com/domains/full-tld-list/'. The navigation menu includes 'Domains' (highlighted with a red box), 'Hosting', 'WordPress', 'Email', 'Marketing Tools', 'Security', 'Transfer to Us', 'Help Center', and 'Account'. The main heading is 'Discover our full list of TLDs' with the subtitle 'Find a top-level domain for your next online project'. Below this is a search bar with the placeholder text 'Look for a domain name', a 'Beast Mode' toggle, and a 'Search' button. The background features a blue space theme with floating 3D blocks representing various domain extensions like '.me', '.live', '.app', '.com', '.org', and '.net'. At the bottom, there is a call to action: 'View all our domain extensions in one place' and a partial view of the text 'Carve out your own space on the Internet with a top-level domain name from'.

HOW TO CHANGE DNS (NAMESERVERS)

The screenshot shows the Namecheap website interface. At the top, the navigation bar includes links for 'Contact us', 'Sign up', and 'Sign in' (which is highlighted with a red box). To the right of these links are icons for a shopping cart, currency (\$ USD), and a search icon. Below the navigation bar, a horizontal menu lists various services: 'ng', 'WordPress', 'Email', 'Marketing Tools' (marked with a 'NEW' badge), 'Security' (marked with a 'NEW' badge), 'Transfer to Us' (marked with a 'TRY ME' badge), 'Help Center' (marked with a 'NEW' badge), and 'Account' (marked with a 'NEW' badge). A red arrow points from the 'Sign in' link to a sign-in modal box. This modal box contains fields for 'Username' and 'Password', a 'Sign in' button, and a link for 'Forgot your password?'. The main content area features a large blue background with the text 'Discover our full list of TLDs' and 'Find a top-level domain for your next online project'. Below this text is a search bar with the placeholder 'Look for a domain name', a 'Beast Mode' toggle, and a 'Search' button. The background is decorated with 3D cubes representing various domain extensions like .co, .net, .org, .com, .app, and .me.

How do I change my nameservers?

[Portal Home](#) / [Knowledgebase](#) / [Domain Names](#) / [How do I change my nameservers?](#)

Your nameservers tell the world which servers are responsible for your domain's DNS. Changing them is typically the last step when you move a domain to a new host. This article walks through updating them from your CanSpace client area.

i **Quick steps:** [Client Area](#) → [Domains](#) → [Manage on your domain](#) → [Nameservers tab](#) → [enter the new nameservers and click Change Nameservers](#).

Steps

1. Log in to the **client area** and open **Domains** → **My Domains**. Click **Manage** on the domain you want to update.

The screenshot displays the Canspace client interface. At the top, the navigation bar includes links for Dashboard, Services, Domains, Billing, and Support, along with a Store and an Open Ticket button. The main heading is 'My Domains', with a search bar and an 'Add New' button. On the left, there is a 'Register a New Domain' section with a search input and a 'Search' button. Below this is an 'Actions' section with a 'Renew Domains' link. The central part of the page features a table of domains. The first row, 'johnsite.ca', is highlighted with a red arrow pointing to it from the left and another red arrow pointing to its 'Manage' button on the right. The table columns are Domain, Next Due, Auto Renew, and Status. The second row is 'test.ca' with a 'Pending Transfer' status, and the third row is 'webhostingincanada.net' with an 'Expired' status. At the bottom of the table, there is a 'Show 10 entries' indicator and pagination controls for 'Previous', '1', and 'Next'.

Domain	Next Due	Auto Renew	Status	Manage
johnsite.ca	17th Apr 2027	ON	Active	Manage
test.ca	14th Apr 2025	-	Pending Transfer	Manage
webhostingincanada.net	16th Jan 2023	-	Expired	Manage

2. Open the **Nameservers** tab in the **Manage** menu on the left. Select **Use custom nameservers**, enter the nameservers provided by your host (typically two, sometimes more), then click **Change Nameservers**.

The screenshot shows the Canspace website management interface. At the top, there's a navigation bar with links for Dashboard, Services, Domains, Billing, and Support. A user profile 'JOHN DOE Doe Corp' is logged in. The main heading is 'Managing johnsite.ca'. On the left, a 'Manage' sidebar lists options: Overview, Auto Renew, Nameservers (highlighted with a red box), Registrar Lock, Contact Information, Private Nameservers, and Get EPP Code. Below this is an 'Actions' section with Renew Domain, Register a New Domain, and Transfer in a Domain. The main content area is titled 'Nameservers' and includes a note about propagation time. It offers two options: 'Use default nameservers' and 'Use custom nameservers (enter below)'. The custom option is selected. Three input fields are provided for Nameserver 1, 2, and 3. Red arrows point to the first two fields, which contain 'ns2.canspace.ca' and 'ns.canspace.ca' respectively.

Nameservers

You can change where your domain points to here. Please be aware changes can take up to 24 hours to propagate.

To use domain forwarding, please set the following nameservers: dns1.canspace.ca, dns2.canspace.ca

☐ Use default nameservers

☒ Use custom nameservers (enter below)

Nameserver 1:

Nameserver 2:

Nameserver 3:

Nameserver 3

Nameserver 4

Change Nameservers

⚠ Heads up: DNS changes can take up to 24 hours to propagate worldwide, though most are visible within an hour or two. During propagation, some visitors may still be directed to the old server.
